ment. Dr. de Kroustckoff announces a series of translations in Russian from the works of leading American, French, and German scientists. The first of these volumes, it is expected, will appear next year, and is to comprise the greater part of Dr. T. Sterry Hunt's "New Basis for Chemistry," together with his studies of the origin and succession of crystalline rocks, the crenitic hypothesis, and various related subjects.

— Messrs. Macmillan & Co. will publish next month a "Browning Cyclopædia," by Dr. Edward Berdoe, one of the most active members of the Browning Society. This volume will deal with the whole of the poet's works, and will contain a commentary on every poem, with explanations of all obscurities and difficulties arising from the historical allusions, legends, classical and archaic phraseology, and curious out-of-the-way terminology, which makes Browning so difficult for the ordinary reader.

— Professor J. R. Cooke of Harvard University, author of the well-known "New Chemistry" in the International Scientific Series, has written a most helpful new book entitled "Laboratory Practice," which, as its name indicates, will be a practical aid to students. The book is designed for a companion to Professor Cooke's "The New Chemistry," which has been for many years a standard work, and has been translated into all the principal European languages. The new book is brought out by the publishers of the other, D. Appleton & Co.

— In addition to the fall announcements of Macmillan & Co. made in our issue of Sept. 25, we note the following. "Symbolism in Christian Art," and "Heraldry," by F. E. Hulme; "Monumental Brasses," by the Rev. H. W. Macklin; Behaghel's "The German Language," translated and adapted for the use of English schools by Emil Trechmann; "A History of Early English Literature," by the Rev. Stopford A. Brooke; "The Buccaneers of America," by Captain James Burney (reprinted from the edition of 1816); "Some Aspects of the Greek Genius," by S. H. Butcher, professor of Greek, Edinburgh; "The Inferno of Dante," translated, with a commentary, by A. J. Butler; "English Literature at the Universities," by S. Churton Collins; "Browning's Message to His Time," by Dr. Edward Berdoe (with a portrait and facsimile letters; second edition, revised and enlarged); "Dante and His Ideal," by Herbert Baynes (with a portrait); "Goethe," by Oscar Browning (with a portrait); "Dante," by Oscar Browning (with portrait); "Browning's Criticism of Life," by W. F. Revell; "Henrik Ibsen," by the Rev. Philip H. Wicksteed; "Epictetus (the Discourses of)," with the Eucheiridion and Fragments reprinted from the translation of George Long (printed on hand-made paper, bound in buckram); "Battles, Bivouacs and Barracks," by Archibald Forbes; two new volumes of essays by E. A. Freeman (I. — Historical, II. — Miscellaneous); "A Short Manual of Philology for Classical Students," by P. Giles, fellow of Gonville and Caius College, Cambridge (uniform with Dr. Gow's "Com-

"The Week, one of the ablest papers on the continent."—*Descriptive America.*

THE WEEK,
A Canadian Journal of Politics, Literature, Science
and Art.

PUBLISHED EVERY FRIDAY.

\$3.00 per Year. \$1.00 for Four Months.

THE WEEK has entered on its EIGHTH year of publication, greatly improved in every respect, rendering it more worthy the cordial support of every one interested in the maintenance of a first-class literary journal.

The independence in politics and criticism which has characterized THE WEEK ever since its first issue will be rigidly maintained; and unceasing efforts will be made to improve its literary character and increase its attractiveness as a journal for the cultured home. Many new and able writers are now, or have promised to become, contributors to its columns, and the constant aim of the Publisher will be to make THE WEEK fully equal to the best literary journals in Britain and the United States.

As heretofore, PROF. GOLDWIN SMITH will, from time to time, contribute articles. London, Paris, Washington and Montreal letters from accomplished correspondents will appear at regular intervals. Special Ottawa Letters will appear during the sessions of Parliament.

THE WEEK being the same size as "Harper's Weekly," is the largest paper of its class on the continent.

BY THE SAME AUTHOR. RACES AND PEOPLES.

"The book is good, thoroughly good, and will long remain the best accessible elementary ethnography in our language."—*The Christian Union*.
"We strongly recommend Dr. Brinton's 'Races and Peoples' to both beginners and scholars. We are not aware of any other recent work on the science of which it treats in the English language."—*Asiatic Quarterly*.
"His book is an excellent one, and we can heartily recommend it as an introductory manual of ethnology."—*The Monist*.
"A useful and really interesting work, which deserves to be widely read and studied both in Europe and America."—*Brighton (Eng.) Herald*.
"This volume is most stimulating. It is written with great clearness, so that anybody can understand, and while in some ways, perforce, superficial, grasps very well the complete field of humanity."—*The New York Times*.
"Dr. Brinton invests his scientific illustrations and measurements with an indescribable charm of narration, so that 'Races and Peoples,' avowedly a record of discovered facts, is in reality a strong stimulant to the imagination."—*Philadelphia Public Ledger*.
"The work is indispensable to the student who requires an intelligent guide to a course of ethnographic reading."—*Philadelphia Times*.

Price, postpaid, \$1.75.

THE MODERN MALADY; or, Sufferers from 'Nerves.'

An introduction to public consideration, from a non-medical point of view, of a condition of ill-health which is increasingly prevalent in all ranks of society. In the first part of this work the author dwells on the errors in our mode of treating Neurasthenia, consequent on the wide ignorance of the subject which still prevails; in the second part, attention is drawn to the principal causes of the malady. The allegory forming the Introduction to Part I. gives a brief history of nervous exhaustion and the modes of treatment which have at various times been thought suitable to this most painful and trying disease.

IV. THE CHEROKEES IN PRE-COLUMBIAN TIMES. By CYRUS THOMAS.

12°. \$1.
Dr. Thomas has already presented to the public some reasons for believing the Cherokees were mound-builders, but additional evidence bearing on the subject has been obtained. A more careful study of the Delaware tradition respecting the Tallegwi satisfies him that we have in the Bark Record (Walam Olum) itself proof that they were Cherokees. He thinks the mounds enable us to trace back their line of migration even beyond their residence in Ohio to the western bank of the Mississippi. The object is therefore threefold: 1. An illustration of the reverse method of dealing with prehistoric subjects; 2. Incidental proof that some of the Indians were mound-builders; 3. A study of a single tribe in the light of the mound testimony. This work will be an important contribution to the literature of the Columbian discovery which will doubtless appear during the coming two years.

"A valuable contribution to the question, 'Who were the mound-builders?'"—*New York Times*.
"Professor Cyrus Thomas undertakes to trace back the evidences of a single Indian tribe into the prehistoric or mound-building age."—*N. Y. Sun*.
"An interesting paper."—*Christian Union*.

V. THE TORNADO. By H. A. HAZEN.

12°. \$1.
"The little book is extremely interesting."—*Boston Transcript*.
"A book which will find many readers. The chapter on 'Tornado Insurance' is of interest to all property-holders in the tornado States."—*Boston Herald*.
"The 'Tornado' is a popular treatise on an important province of meteorology, in which science, the author, Professor Hazen of the United States Signal Service, may be regarded as an expert."—*Philadelphia Ledger*.

VI. TIME-RELATIONS OF MENTAL PHENOMENA. By JOSEPH JASTROW.

12°. 50c.
"All students of psychology will find the book full of interesting facts. Professor Jastrow's good qualities as a thinker and as a writer are too well and too widely known to require comment."—*Public Opinion*.

"A useful work for psychologists—as well as the general reader—by setting forth in brief and easily intelligible form the present state of knowledge in regard to the time required for the performance of mental acts."—*The Critic*.
